

TURNKEY SERVICES

When It's Time To Build New Generation Find The Expertise You Need In One Company

For cost-effective, turnkey generation development services from a company that knows public power, turn to Spectrum Energy, Inc.

Spectrum Energy provides complete engineering, procurement, construction and commissioning services for combustion turbine and reciprocating engine power plants.

Since 1998, Spectrum has completed projects for the U.S. market totaling more than 660 megawatts, including 45 MW projects for City Water & Light of Jonesboro, Ark., and the Delaware Municipal Electric Corporation.

Spectrum Energy is offering a 10 percent discount on engineering fees to members of the American Public Power Association in partnership with Hometown Connections.

Owned by APPA, Hometown Connections arranges lower purchase prices from leading suppliers on behalf of all APPA member utilities.

Begin your next power plant project by contacting Hometown Connections at 970-871-1075.
